

Bailey Boswell Overpass Update

August 25, 2020

The City of Saginaw would like to keep businesses along Bus. 287 (Saginaw Boulevard) and Bailey Boswell informed about intermittent changes to traffic patterns associated with the Bailey Boswell Overpass. Two exhibits have been provided that show construction activity, including traffic lane closures, along Bailey Boswell Boulevard.

Beginning the week of August 31st, Bailey Boswell Boulevard will have traffic lane closures both east and west bound. West bound traffic will be narrowed to one lane from Saginaw Boulevard to a point approximately 300 feet east of Knowles Drive. East bound traffic will have two lanes available within the same limits. The existing median opening that allows crossing between the CVS and Albertson's will be taken out of service during this phase of construction and replaced with a U-turn median opening near Saginaw Boulevard in late November. During the September/October time frame, both of Walmart's driveways will be reconstructed including the construction of new turn lanes.

On the east side of Saginaw Boulevard, the west and eastbound lanes will be reduced to one through lane, however the dual left turn lanes onto Saginaw Boulevard will remain open and not be impacted during this period of construction. The contractor is placing electronic signage advising west bound traffic to use the turn lanes for access to all businesses in the Albertsons shopping center.

Certainly, the City of Saginaw is sensitive to impacts on business. If you have any questions or concerns, please contact Rick Trice, Director of Public Works at rtrice@saginawtx.org. If you have anyone who would like to get an email regarding construction updates as they become available, please send their contact email to Mr. Trice at the same email account.
